### 5. Fire Fighting Measures

Flammable Properties	: Flash point Not flammable
Extinguishing Media	: Use extinguishing media suitable for surrounding area.
Unsuitable Extinguishing Media	: There is no restriction on the type of extinguisher which may be used.
Special Hazards Arising from the Chemical	: Development of hazardous combustion gases or vapor possible in the event of fire.
Special Protective Equipment and Precautions for Firefighters	: As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear. Fight fire from a safe distance, with adequate cover. Prevent fire extinguishing water from contaminating surface water or the ground water system.

### 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures	: Use personal protective equipment, do not breathe gas/mist/vapour/spray. Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.
Methods and Materials for Containment and Cleaning Up	: Cut off the source of the leak as much as possible. Keep leaks in a ventilated place. Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment. Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.
Environmental precautions	: Prevent further leakage or spillage if safe to do so. Discharge into the environment must be avoided.

## Safety Data Sheets
